Left Hand

Score Sheet

|  | Points Achievable | Score Given |
|--|-------------------|-------------|
| <b><u>Polish</u></b><br>Red Creme polish must be applied to the pinkie and thumb only, with a smooth, even finish and a 1mm cuticle gap. No streaks, flooding, or residue on the skin or under the nail.   | 10                |             |
| <b><u>Finish / High Shine</u></b><br>Index, middle, and ring fingers must have a flawless, glossy finish using a high-shine buffer only — no top gel or polish. Surface must be smooth, with no scratches or matte areas.  | 10                |             |
| <b><u>Hairline &amp; Free Edge Thickness</u></b><br>All nails must be consistently and uniformly thin, with no nail thicker than a standard business card. Thinner, more precise work will be rewarded as it reflects a higher level of technical difficulty and control | 10                |             |
| <b><u>Nail Length</u></b><br>All five nails must be consistent and in proportion with the hand, following natural bone structure. The pinkie should be shortest, the middle and thumb longest. Extensions must measure 50-100% of the nail bed.                          | 10                |             |

|  | Points Achievable | Score Given |
|--|-------------------|-------------|
| <b><u>Lower Arch / Lower Side-line</u></b><br>Lower side-lines must be straight and even, extending cleanly from the lateral folds with no ridges or steps. They must run parallel to the upper arch and end at equal heights when viewed from the C-curve or hairline perspective.  | 10                |             |
| <b><u>Upper Arch / Upper Side Line (Top &amp; Side View)</u></b><br>From the side view, the upper arch must run parallel to the lower arch and remain consistent across all five nails. From the top view, side lines must follow the natural lateral walls and be parallel .  | 10                |             |
| <b><u>Cuticle Area</u></b><br>Product must be applied smoothly with no gaps, ledges, or flaws. Enhancements should look naturally grown from the nail bed. The surrounding skin must be free from cuts or irritation—any damage will result in deductions.   | 10                |             |
| <b><u>Smile Line</u></b><br>Smile lines must be clean, consistent, and precise across all five French nails, with no marbling, pits, or unevenness. The index and ring fingers must have matching smile line lengths; the middle finger's must be longer. End points should be sharp, symmetrical, and end exactly within the lateral folds. | 10                |             |

|  | Points Achievable | Score Given |
|--|-------------------|-------------|
| <b><u>Apex</u></b><br>The apex must be placed consistently across all nails with a smooth, elegant arch that complements the structure. It should be positioned between 25–50% of the nail bed length, with the same ratio applied to every nail.  | 10                |             |
| <b><u>Application of white</u></b><br>The product must be applied evenly across all with no shadows, bubbles, pits, or inconsistencies.<br>The transition between pink and white should be clean and sharp, showcasing precise control and high-quality application.   | 10                |             |
| <b><u>C-curve</u></b><br>The C-curve must be symmetrical and consistent across all five nails, following the natural shape from cuticle to free edge in both convex and concave views. The chosen C-curve depth must be between 40% -50% of a full circle, and once selected it must be maintained uniformly on every nail.  | 10                |             |
| <b><u>Application of Pink Nude</u></b><br>Product must be applied evenly across all five nails, free from shadows, bubbles, pits, or marbling. The same pink nude must be used throughout. Smile lines must be sharp with a smooth blend toward the cuticle. Nail bed lengths on the index and ring fingers must match, with the middle finger's longer. Endpoints should align symmetrically. | 10                |             |
| <b><u>Tip or Form Application</u></b><br>Tips or forms must be straight, well-fitted, and consistently applied with no gaps, tilting, or uneven placement. Application should create a strong, balanced foundation for the enhancement.  | 10                |             |
